ZIHAN

Roll Number

3BR23EE113

## EXPERIMENT

Title

SIGNATURE FOR LCM

Description

Given two numbers a and b. Find the GCD and LCM of and b.

Input:

- Two positive integers a and b (1 <=a, b <=1000)

Output:

For GCD function, an integer representing the GCD of a 'and b

For LCM function, an integer representing the LCM of a and b

Sample Input:

12 18

Output:

6

36

Explanation:

The GCD of 12 and 18 is 6. The LCM of 12 and 18 is 36.

Source Code:

```
def gcd(a, b):  
    while b:  
        a, b = b, a % b  
    return a  
  
def lcm(a, b):  
    return (a * b) // gcd(a, b)  
  
# Input  
a, b = map(int, input().split())  
  
# Calculate GCD and LCM  
gcd_result = gcd(a, b)  
lcm_result = lcm(a, b)  
  
# Output  
print(gcd_result)  
print(lcm_result)
```
